EDUCATION

Virginia Tech

Bachelor of Science in Computer Science; Human Computer Interaction Minor
Cum Laude

Blacksburg, VA

August 2021 - May 2025

WORK EXPERIENCE

Full-Stack Software Engineer

CoStar Group

Arlington, VA

July 2025 – Present

- Built and maintained full-stack web applications, contributing to both frontend (React, JavaScript) and backend (C#/.NET) development.
- Developed reusable, custom React components and integrated them into production features, improving UI consistency and performance.
- Designed and implemented RESTful APIs, data models, and routing logic to support internal applications.
- Designed Figma mockups and implemented them into responsive, production ready features.

Undergraduate Research Assistant

Virginia Tech

Blacksburg, VA

Jan 2023 – May 2025

- **SeeMore Project:** Revitalized legacy kinetic sculpture system, migrating from non functional Mac Mini to Raspberry Pi 4B; reverse-engineered and restored servo motor control systems from 2014 installation.
- **Hidden Figures in HPC:** Developed JavaScript visualizations and contributed to Python backend (Flask, SQLAlchemy) highlighting underrepresented individuals in HPC; compiled database of 300+ profiles.
- Selected as one of 5 students to receive full scholarship to present at SC23 International Conference in Denver (13,000+ attendees).
- Mentored new students on codebase contribution in multi-contributor open-source environment.

Software Engineer Intern

CoStar Group

Richmond, VA

June 2024 – August 2024

- Built production React dashboard for Case Management team integrating AWS CloudWatch APIs and Highcharts for real time SQS queue monitoring.
- Developed comprehensive filtering functionality by queue name, time range, and status with customizable dashboard layouts.
- Successfully deployed to production, now actively used for daily operations and incident response by multiple teams.

PROJECTS

Mabawa Scratch Coding Workshop | Nyamyumba, Rwanda

- Designed and delivered computer literacy lessons for women and children, including storytelling through Scratch coding.
- Taught 3rd grade students the fundamentals of programming and computational thinking in Nyamyumba.
- Focused on making technology accessible and empowering underserved communities through creative and inclusive learning.
- Rewarded with the Emily Specchio Foundation Scholarship

Bun Appétit

- Developed gamified food journaling app connecting parents and children across distance using AI-powered food recognition.
- Implemented AI component to scan and identify food photos with confidence scoring for game progression.
- Created custom prompts for unique character dialogue and integrated nearby farmers market identification features.
- 1st Place VTURCS Winner.

SKILLS

- **Languages:** C#, C, Python, JavaScript, HTML, CSS
- **Technologies:** Git, Linux, AWS, SQL, Figma,
